

# Flexpooling

Flexpooling brings workers together to reduce traffic along specific corridors. Hacienda workers with long commutes (and empty seats) spend a few minutes to pick up workers with shorter commutes. Colored arrows illustrate pickup points.

**San Ramon Road Route**

**Village Pkwy Route**

**Dougherty Rd. Route**

**Hacienda PRT System**

**Santa Rita Road Route**

**Valley Ave. Route**

**Hopyard Road Route**

Cell phones and FasTrak help to tightly coordinate the rendezvous with Flexpool passengers so they do not have to wait around. Taxis also ply these routes during commute hours, helping to create a continuous flow of vehicles picking up commuters. Background checks, automated arrival verification, and reputation ratings will ensure smooth, safe operation. Some Flexpool drivers leave I680 one exit early in order to make pickups.
